

Andrew Davis — AI Trainer • Ethics Analyst • Prompt Engineer

■ teamreilc@gmail.com | ■ GitHub: [andrew-davis-ai-portfolio.github.io/Andrew-Davis-Ai-Portfolio/](https://github.com/andrew-davis-ai-portfolio)

Professional Summary

AI Trainer and Ethics Analyst specializing in machine learning oversight, RLHF (Reinforcement Learning from Human Feedback), and ethical model alignment. Certified across multiple AI disciplines including prompt engineering, no-code automation, and AI-assisted software design. My mission is to align emerging AI systems with clarity, context, and human-centered precision — building safer, smarter, and more transparent models for the future of technology.

Core Certifications

- The Complete AI Coding Course (2025) – Cursor, Claude Code — Udemy
- Complete AI Mastery & Advanced Prompt Engineering Bootcamp — Udemy
- From Zero to Hero in AI & Machine Learning (No Coding) — Udemy
- AI Ethics 2025: Work with AI Responsibly — Udemy

Technical Highlights

- Expert in AI model evaluation, data annotation, and bias auditing
- Skilled in prompt design, system instruction, and human-AI communication logic
- Experienced in no-code automation tools (n8n, Zapier, and GPT-workflow integrations)
- Knowledge of LLM training data pipelines, safety layers, and supervised reinforcement methods
- Strong understanding of ethical frameworks, fairness metrics, and responsible deployment

Mission Statement

“These \$15 courses will one day become full college curriculums costing thousands. The future is cheap for those who see it early.”
